Dear Sirs:

At a recent City of Elgin Council meeting, the Council authorized the installation of a 7000 Lumen Mercury Vapor Street light at the intersection of North 4th Street and Columbus Street.

There is an existing light pole located at this intersection and an existing street light located approximately in the center of this block. Would it be feasible to place the existing street light on the light pole located at the intersection of North 4th and Columbus Streets?

Very truly yours,

City Recorder
City of Elgin, Oregon
